TINY MONITOR — DIGITAL FORENSICS REPORT

Incident Response & TinyFish Threat Intelligence Dossier

Case Number:	**TM-2026-001**	**Classification:**	**CRITICAL SEVERITY**
Case Title:	Finance DC Ransomware Outbreak	**Current Status:**	**OPEN**
Lead Investigator:	Mohith R	**Generated By:**	Mohith R
Initial Incident Date:	2026-10-27 14:39:01 UTC	**Report Date:**	2026-10-27 14:39:01 UTC

1. Executive Summary

This document represents the official digital forensic investigation dossier for **TM-2026-001**. A total of **1** physical/logical evidence files have been cryptographically preserved. **0** external threat intelligence lookups were executed through the TinyFish Search API. All digital evidence files maintain cryptographic SHA-256 integrity baseline verification.

Incident Summary: Suspect Cobalt Strike beacon detected on domain controller DC-01.

2. Digital Evidence Inventory & Cryptographic Baseline

#	Filename / Size	SHA-256 Cryptographic Hash	Acquired / Status
1	**infected_payload.bin** 38 bytes (application/octet-stream)	`8013d82fce06d6407cd2200e4d4bf77b0ef1242c01caf35dc67b2f643e4e1745`	2026-10-27 **MATCH**

3. TinyFish Threat Intelligence Findings

No threat intelligence queries have been executed for this case.

4. Chronological Investigation Timeline

Timestamp (UTC)	Event Type	Actor	Details / Action Taken
2026-10-27 14:39:01	**CASE_CREATED**	Mohith R	**Case Initialized: TM-2026-001** Case created with severity CRITICAL. Title: Finance DC Ransomware Outbreak
2026-10-27 14:39:01	**EVIDENCE_UPLOADED**	Mohith R	**Evidence Acquired: infected_payload.bin** SHA-256: 8013d82fce06d6407cd2200e4d4bf77b0ef1242c01caf35dc67b2f643e4e1745 (38 bytes)
2026-10-27 14:39:01	**INTEGRITY_VERIFIED**	Mohith R	**Integrity Check: infected_payload.bin (PASSED)** Integrity check PASSED. Current SHA-256 matches acquisition baseline.

5. Investigator Notes & Conclusions

No formal analyst conclusion notes entered.

6. Forensic Boundaries & Methodology Disclaimer

FORENSIC SOUNDNESS & OPEN-SOURCE INTELLIGENCE BOUNDARIES:

*1. **Evidence Integrity:** Cryptographic SHA-256 hashes are calculated upon acquisition and re-calculated on demand. Evidence files are preserved in protected storage outside web static roots. No evidence bytes were modified or transmitted to external services.*

*2. **External Threat Intelligence:** Data retrieved via the TinyFish Search API reflects publicly indexed threat advisories, vendor bulletins, and security feeds at the moment of lookup. Search results are investigative leads and do not constitute independent digital forensic proof or legal attribution.*

*3. **Zero Fabrication:** This report was automatically compiled from active database records. No test results or search findings were fabricated or omitted.*

*4. **Presidency University Hackathon:** Generated by **TINY MONITOR** for the Swim with TinyFish Hackathon.*
